CDAO Fall

Turning AI into Real Business Impact

AI ISN'T JUST AN OPTION.

Adopt AI or Fall Behind.

"Ignoring AI will not just mean losing out to competitors; it will mean extinction in the digital age."

— Paul Daugherty – CTO at Accenture

Cost of the Status Quo

→ Time & Labor

Manual labor alone is time intensive, expensive, with less insights.

→ Quality & Risk

Inconsistency and manual effort drive rework and audit overhead.

→ Opportunity Cost

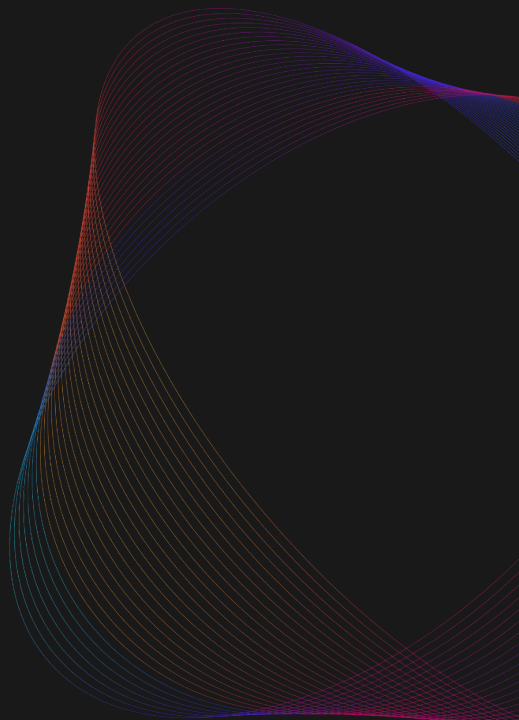

Slower outputs risk missed or late success on high-value opportunities.

AI is everywhere.

Business impact is not.

- ✘ Enterprises are flooded with GenAI tools but very few deliver **real outcomes**.
- ✘ Generic tools **don't fit** your real-world needs and are **inaccurate**.
- ✘ Teams have a **huge backlog** and are stuck stitching infra, tools and models together.

"95% of generative AI pilots at companies are failing" — MIT

What's Wrong with [that] AI?

→ **It's trying to be everything at once**

Being broadly competent can sometimes hinder deep domain expertise.

→ **Customization consumes too much time**

Months or years to get the right fit.

→ **It's an expensive risk**

Investing in AI doesn't promise a return on investment.

It exists.

The right AI Solution is out there

- Specific, customized, tailored
- Highly accurate
- Easily adoptable
- No upfront risk [free POCs]
- Measured by Return on Investment (ROI)
- More than graphs & dashboards
- No data cleaning required
- No need to maintain models
- Flexible deployment

The Unframe Platform

A new way to get **AI-native enterprise solutions**.

1. We land on the **right use case** for your business.
2. We deliver a production-ready solution on our platform **in days**.
3. You subscribe only **when you're happy** with the outcome.

Integrate with anything. Fast.

Any SaaS

Any API

Any DB

Any File

Complete Solutions

Unframe creates solutions for **entire use cases** not just point tools like bots or search.

Production Ready

Enterprise-grade, fully managed, tailored for your data, in a **turnkey solution**.

Alternatives & Why This Path

BUILD VS. BUY

STATUS QUO

Slow, inconsistent, generic,
error-prone processes.

CUSTOM BUILD

Will take 9-12 months, will be very
expensive, has no future state
without heavy consulting, has no
upside to new use cases.

Unframe

Transparent, configurable platform
that compounds value across use
cases.

Risk, Security & Compliance

Transparent by design

Full transparency & Control:

visible data flows, modifiable AI contexts, activity logs, audit trails.

Human-in-the-loop for data

modifications; permissions-aware actions; admin visibility to workflows.

Deployment flexibility:

Cloud or on-prem (reference footprint provided).

SOC 2
Type II

BEHIND THE MAGIC

Deep Technical Building Blocks

**OmniQuery**

Searches, queries, and analyzes across systems in one sweep.

AgentHive

Orchestrates AI teamwork with human-like intuition.

DataAlchemist

Turns messy docs & sheets into structured gold, ready to query and connect.

CogniSearch

Hybrid semantic & lexical search for structured & unstructured data.

UniConnect

Seamlessly ties every system together, decoding contexts on the fly.

FlowForge

Builds smarter workflows that evolve with every task.

GraphSynergy

Connects the dots in your data with visual brilliance.

AnomalySpotter

Spots the odd one out before it's a problem.

TimeSculptor

Sees the past, predicts the future, in real time.

LogicLift

Modernizes systems by unlocking their hidden rules.

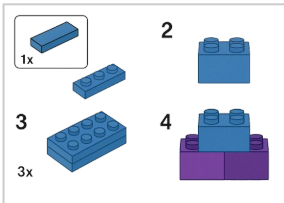

ReasonTrace

Explains the 'why' behind the answer.

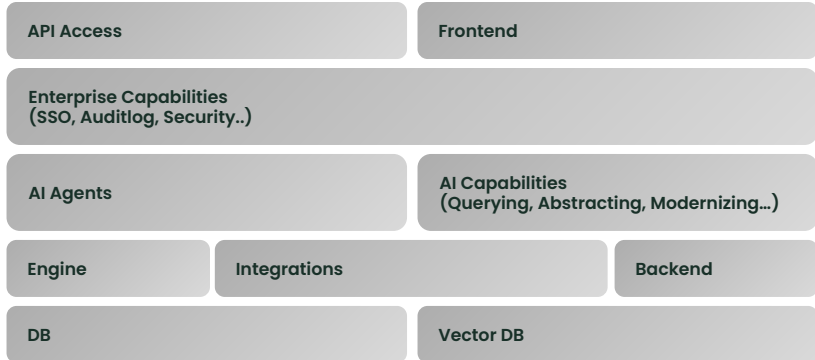

& Many more

PUTTING IT TOGETHER

The Blueprint

Classic AI Solution Stack

Unframe AI Solution Stack

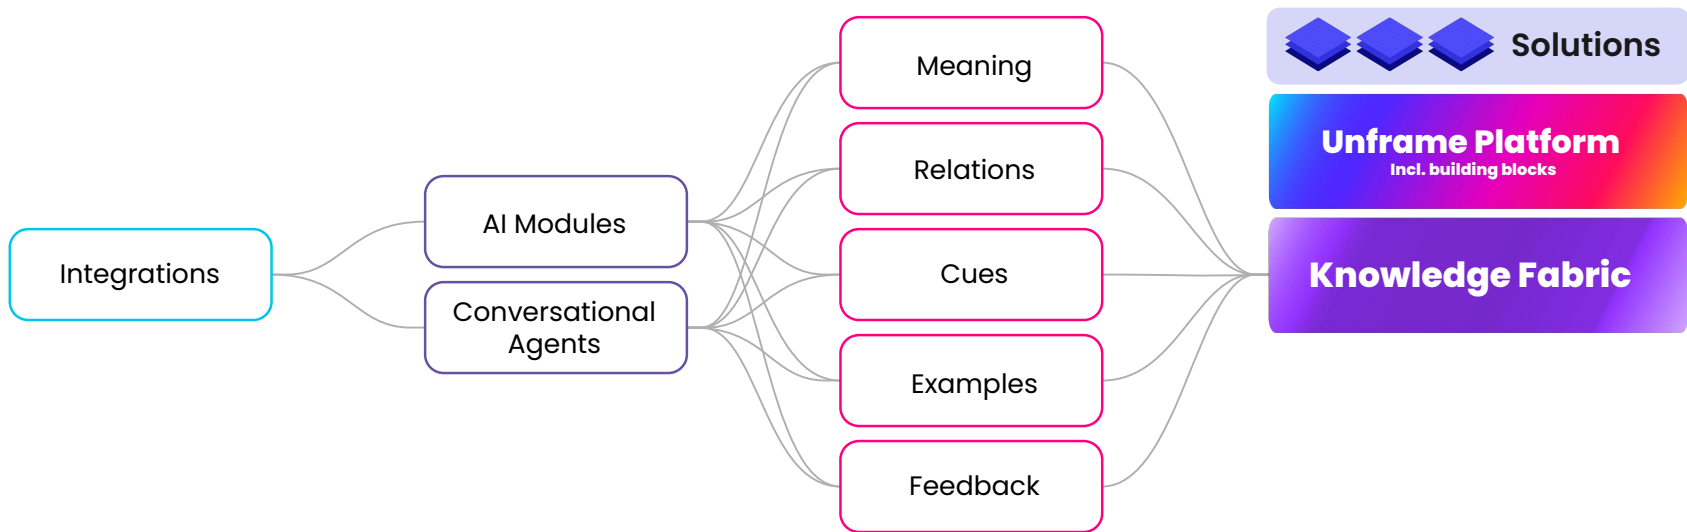

No data leaves your perimeter LLM agnostic

ACCUMULATED KNOWLEDGE

The Knowledge Fabric

AI-native representation of your business

SOLUTION CAPABILITIES

Where do we usually start?

Observability & Reporting

- ▶ **Search** across scattered systems
- ▶ **Ask** questions in natural language
- ▶ **Auto-generate** dashboards

Extraction & Abstraction

- ▶ **Turn** unstructured docs & files into useful, structured data
- ▶ **Identify** entities, clauses, numbers and metrics
- ▶ **Surface** powerful insights

Automation & Agents

- ▶ **Automate** complex and repetitive workflows with AI
- ▶ **Communicate** via Slack, Email or Teams
- ▶ **Trigger** end-to-end processes
