9:40am-10:10am	<p>Presentation: “Weaponizing” data as a competitive advantage: Thoughts from the frontline on how we got here, where things are going and how to not lose, or lose your mind, in the world of AI, ML and ChatGPT</p> <p>Welcome to age of Artificial Intelligence and Machine Learning, otherwise known as the Fourth Industrial Revolution. While we can trace steady advances in microchips over the past fifty years, the past 50 months have clearly demonstrated the disruptive force that generative artificial intelligence has become, particularly for leaders in volatile and uncertain business environments. As members of the commercial scientific community, we recognize that discovery and innovation is often isolated, by both approach and time, from the applied science that changes industry. Our call to action will focus on “weaponizing” data as a competitive advantage. Along the way we will look to what we can be learned and applied from human biochemistry, skyscrapers and Marco Polo.</p>
